

Accidents in the Home

Children under 5 at the Dangershire Hospital

Look carefully at the information shown on the bar chart below.

1. Transfer the information on the bar chart into a table like the one shown below.
2. Give your table a suitable title.

Types of injuries	Number of injured children under 5 years old		
	Girls	Boys	Total
Swallowing dangerous substances			
Head injuries			

Now answer these questions in sentences

- In total, how many girls needed to go to the Dangershire Hospital between April 2005 and March 2006? How many boys?
- What sort of accidents do you think caused the children's head injuries and cuts to their heads? An example- falling down the stairs.
- What sort of accidents do you think caused the children's burns and scalds?
- The bar chart shows a large number of children needed to go to the Dangershire Hospital because of Other injuries.
- What do you think these Other injuries were and what caused them?
